## AS-Interface Power Supply with 8A SLA8.100

- Input: AC $115 \mathrm{~V} / 230 \mathrm{~V}$
- Output: $30.55 \mathrm{~V} / 8 \mathrm{~A}$
- AS Interface data decoupling
- Infrared (IR) addressing mode
- Overload protection by FUSE Mode
- For highly demanding industrial applications

## Short description

## Data and energy:

The primary switched mode DIN rail power supply SLA8.100 specifically supplies AS Interface ${ }^{\circledR}$ systems with energy. The AS-Interface bus technology allows to connect up to 62 participants to a control and to supply them with energy with a single two-conductor cable. When connecting slaves, the yellow AS-Interface cable offers the high degree of protection IP67 in conjunction with the insulation displacement. The communication signals of the individual network participants are modulated onto the supply voltage. For this purpose, specific power supply units with integrated data decoupling are required for AS-Interface systems.

## Fast addressing of slaves:

The "IR addressing mode" selectable via jumper interrupts the data communication on the yellow AS-Interface cable. Participants with an infrared interface can then quickly be assigned a new ID address by means of an infrared programming unit without the need to disconnect them from the AS-Interface cable. Afterwards, the "Communication Mode"

## Input

| Rated voltage | AC 100-120/220-240V (selectable by front panel slide switch) |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Rated current | 6.0A (switch in 115 V position) <br> 2.8A (switch in 230 V position) |  |  |  |
| Frequency | $47 . . .63 \mathrm{~Hz}$ (alternatively also DC possible) |  |  |  |
| Voltage range | AC 85...132V/184...264V, DC 230...375V |  |  |  |
| Power factor | >0.5 |  |  |  |
| Integrated internal fuse | T8A/250V HBC (ot accessible) |  |  |  |
| Inrush current | Limited by NTC resistor (bypassed by a relay during normal operation) $\mathrm{T}_{\mathrm{amb}}=+50^{\circ} \mathrm{C}$, cold start (line impedence acc. EN 61000-3-3) |  |  |  |
|  | AC 100V | AC 120V | AC 220V | AC 240V |
| Peak current $\mathrm{I}_{\mathrm{pk}}$ | $<12 \mathrm{~A}$ |  |  |  |
| $\mathrm{I}^{2} \mathrm{t}$ | $<1.0 \mathrm{~A}^{2} \mathrm{~s}$ | $<1.5 \mathrm{~A}^{2} \mathrm{~s}$ | $<1.4 \mathrm{~A}^{2} \mathrm{~s}$ | $<1.6 \mathrm{~A}^{2} \mathrm{~s}$ |
| Hold-up time | $>10 \mathrm{~ms}$ @ AC 100 V or AC 196 V and rated load (also see diagram) |  |  |  |

can be selected again to re-start the data communication.

## Safe operation by FUSE Mode:

The device features a FUSE Mode, which permanently switches off the output in the event of failure and the unit at overload, short-circuit or overtemperature and thus protects the relatively thin AS-Interface line and the attached components. Triggering of the FUSE Mode is indicated by a flashing LED. System restart requires the intentional activation of a reset button on the front side of the unit. Thus, an accidental restart is prevented and the slaves are protected against damage.

## Fit for the world market:

The input voltage range of the unit can be selected on the front panel. Thus, it can be operated worldwide on all usual single-phase line voltages. International (IEC 60950) and various national (CBscheme) approvals allow for worldwide application.

## Output

| Rated voltage | DC $30.55 \mathrm{~V} \pm 3 \%$ (not adjustable) |
| :--- | :--- |
| Rated current | 8.0 A |
| Isolation | Safe low voltage <br> PELV (IEC364-4-41) <br> SELV (IEC60950) |
| Current limitation | $>8.4 \mathrm{~A}$ |
| Overload behaviour | FUSE Mode (2...5s continuous current, after- <br> wards permanent switch-off) |
| Short-circuit current | $>12 \mathrm{~A}<25 \mathrm{~A}$ (max. 5s) |

## Order information

Order number
SLA8.100
SLZ13
SLZ02

## Description

AS-Interface power supply unit
Adapter for S7-300 rail
Wall mounting set (two pcs. per package)

## FUSE Mode

The FUSE Mode (electronic fuse in the output) protects the unit from overload and overtemperature.

## Shutdown:

- At overtemperature, overload or short-circuit ( $8.4 \mathrm{~A}<\mathrm{I}_{\max }<12 \mathrm{~A}$ ), the unit switches off the output after 2...5s

## Indicator:

- Activation of the FUSE Mode is indicated by a flashing red LED

## Reset / Restart:

- by intentionally pushing the Reset button on the unit front panel
- by turning off the mains voltage. Before restarting the unit, wait at least twice the time the flashing red LED needed to extinguish after the mains voltage dropped.

## Operating and environmental data

| Non-operating temperature range | $-25^{\circ} \mathrm{C} . . .+85^{\circ} \mathrm{C}$ |
| :---: | :---: |
| Operating temperature range | $-10^{\circ} \mathrm{C} \ldots+70^{\circ} \mathrm{C}$ <br> (measured at 25 mm below the unit) |
| Derating | from $60^{\circ} \mathrm{C} 6 \mathrm{~W} /{ }^{\circ} \mathrm{C}$ onwards, power reduction necessary (see diagram) |
| Cooling | natural convection, no forced air-cooling necessary |
| Over-temperature protection | implemented |
| Humidity | protect from moisture and condensation |
| Vibration | $2-17.8 \mathrm{~Hz} \pm 1.6 \mathrm{~cm}$ |
| - Sinus | $17.8 \mathrm{~Hz}-500 \mathrm{~Hz} 2 \mathrm{~g}$ (IEC 68-2-6) |
| - Random | $2 \ldots 800 \mathrm{~Hz} \quad 0.5 \mathrm{~m}^{2}\left(\mathrm{~s}^{3}\right)$ (IEC 68-2-64) |
| Shock | 15 g (6ms), 10g (11ms), (IEC 68-2-27) |
| Degree of pollution | 2 (EN 60950) |
| Overvoltage category | III (EN 50178) |

## Electromagnetic Compatibility (EMC)

| Emissions | EN 50081-2 Class B (EN 55011, EN 55022) |
| :---: | :---: |
| Immunity <br> - Electrostatic Discharge (ESD) | EN 61000-6-2 (also includes EN 55024) EN 61000-4-2, Level 4 <br> (withstands 8 kV direct discharge, 15 kV air discharge) |
| - Electromagnetic radiated fields | EN 61000-4-3, Level 3 ( $10 \mathrm{~V} / \mathrm{m}$ ) ENV 50204 ( $10 \mathrm{~V} / \mathrm{m}$ ) |
| - Burst, coupled to: <br> - ACin lines <br> - DCout lines | EN 61000-4-4, Level 4 ( 4 kV ) Level 3 ( 2 kV ) |
| - Surge transients <br> - Differential mode ( $L \rightarrow P E$ ) <br> - Common mode ( $\mathrm{L} \rightarrow \mathrm{N}$ ) | EN 61000-4-5, Installation class 4 ( 4 kV ) <br> Installation class 4 (2kV) |
| - Conducted noise immunity | EN 61000-4-6, <br> Level 3 ( $10 \mathrm{~V}, 150 \mathrm{kHz}-80 \mathrm{MHz}$ ) |
| - Voltage dips | EN 61000-4-11 |
| - Transient immunity | Transient resistance acc. to VDE 0160 / W1 across entire load range |

## Efficiency, Reliability

| Efficiency | typ. 92\% | (AC 230V, 8A) |
| :--- | :--- | ---: |
| Power dissipation | typ. 21.2W | (AC 230V, 8A) |

## Schematic

## Operating indicators and elements

## Connectors and terminals

| Terminals | Fingertouch-proof terminals with captive screws for 5.5 mm slotted screwdriver or Philips cross-recessed screwdriver No. 2 |
| :---: | :---: |
| Position | Easy to reach terminals on the front panel; input and output clearly separate from each other |
| Tightening torque | 0.8 Nm |
| Connector size range <br> - flexible cable <br> - solid cable | $\begin{array}{ll} 0.5-4 \mathrm{~mm}^{2} & (20-10 \mathrm{AWG}) \\ 0.5-6 \mathrm{~mm}^{2} & (20-10 \mathrm{AWG}) \end{array}$ |
| Ferrules | admissible |
| Stripping length | 7 mm |

## Front elements

| ${\hline \multirow{9}{}}{\mathrm{I}} }$ | PE terminal |
| :--- | :--- |
| $\oplus$ | Input neutral |
| $\Theta$ brown | Input phase |
| Shield | Positive AS-Interface output voltage (twice) |
|  | Negative AS-Interface output voltage (twice) <br> Connection of machine ground. <br> (Functional earth for balancing the AS-Inter- <br> face output. Connection is recommended for <br> EMC) |

## Construction / Mechanics

| Housing | Robust metal housing for built-in installation |
| :--- | :--- |
| Degree of protection | IP20 (EN 60529) |
| Class of protection | 1 (IEC536); <br> do not use without protective earth (PE) <br> Width w |
| Height h 91 mm <br> Depth d 124 mm <br> Weight 102 mm (without DIN rail) <br>  appr. 890 g |  |

## Installation notes

External fusing

- not necessary (internal fuse)
- observe national regulations
- circuit breaker with B-characteristic min. 6A or slower action, or alternatively 6A HBC fuse
Mounting position Free space for cooling above / below 25 mm recommended left / right 15 mm recommended
Always connect PE before operating the unit!
Operation without AS-Interface: This AS-Interface PSU has an inductive output. When operating without AS-Interface structure (e.g. in a laboratory test) you should connect a $470 \mu \mathrm{~F} / 35 \mathrm{~V}$ capacitor between AS-Interface + and AS-Interface - as commercial electronic loads in combination with the data decoupling often tend to oscillate, and the oscillation may exceed the permitted modulation voltage. Otherwise, equipment may be destroyed.
